

INSPIRATION AND
RECOGNITION OF SCIENCE
AND TECHNOLOGY

Your Local FIRST Team

SENSATION 7 ROBOTICS

#14785

Designing, Creating,
Taking Chances.

SENSATIONAL 7 #14785

We're the Sensation 7, a homeschool team who competes in FTC (FIRST Tech Challenge). As a team we face many challenges but burst through them and allow our experience to benefit many.

FIRST

FIRST Tech Challenge is a robotics organization, but it is also much more. FIRST goes out of its way to promote values of communication, innovation, and gracious professionalism. FIRST teams design, build, and program robots, develop strategy, and engage in thrilling, head-to-head competition.

contact form:

Thank you for joining us!

Students in FIRST get to:

- Design, build, and program robots.
- Model a real-world engineering process.
Apply math and science concepts.
- Develop strategic problem-solving,
organization, and team-building skills.
Compete and cooperate in alliances at
tournaments.
- Participants and alumni have access to
education and career discovery opportunities,
connections to scholarships and employers,
and a place in the FIRST community for life.
